

# COVID-19 Basic Infection Prevention Measures

COVID-19, caused by a new coronavirus, is a respiratory illness that can spread from person to person. The following infection prevention measures may help prevent transmission on construction job sites.

|   |   |
|---|---|
|    | Stay home if you are sick. <b>DO NOT WORK.</b>  |
|    | Wash hands frequently or provide alcohol-based hand rubs containing at least 60% alcohol.   |
|    | Cover coughs and sneezes.   |
|    | Practice social distancing — try to maintain 6 feet between each worker.  |
|    | Reduce the size of any group at any one time to ten (10) people or less or <b>LIMIT</b> all in-person meetings.   |
|   | Minimize ride-sharing. While in vehicle, employees must ensure adequate ventilation.  |
|  | Avoid sharing tools with co-workers, if possible.   |
|  | Clean and disinfect frequently used tools, equipment, and frequently touched surfaces (door handles, handrails, machinery controls, cell phones, tablets) on a regular basis. |
|  | If N95 respirator masks are not available, minimize dust and airborne contaminants by using engineering and work practice controls.   |
|  | Use proper personal protective equipment (PPE) when cleaning and disinfecting, such as gloves and eye protection.   |
